### Trader USA introduces proprietary ZoneTrader indicator package for NinjaTrader

**Denver, CO, November 5, 2009** – NinjaTrader, LLC, a leading provider of high-performance trading software for active traders, announced today that Trader USA proprietary indicators are now available for the NinjaTrader platform. Trader USA users can execute trades through NinjaTrader, an industry leading trading platform that is supported by all leading market data vendors and world-wide network of supporting brokerages.

Trader USA introduces the powerful, proprietary ZoneTrader indicator package for use with NinjaTrader's state-of-the-art charts. The ZoneTrader is a complete indicator package using multi time frame analysis to identify trade setups in a variety of different markets. Traders follow the ZoneTrader' ZSR bands to identify potential trade setups using a smaller time frame and then confirm the direction of the market using the same bands on a longer time frame chart. The ZSR bands are calculated each evening from proprietary algorithms and loaded on to the ZoneTrader servers. The information is then automatically plotted on the end user's NinjaTrader chart.

"We are excited to offer the ZoneTrader indicators for NinjaTrader since it introduces our indicators to the largest community of active traders" says Mike Green, Developer of Trader USA. "NinjaTrader also gives our clients a superior edge with a powerful combination of user-friendly charting and innovative order management with NinjaTrader's industry leading trading platform."

### About NinjaTrader, LLC
